

3b

ASSOCIATED BRITISH PORTS

Role: Principal Contractor **Client: Associated British Ports**

3b construction was selected as Principal Contractor to deliver the design and build of bulk storage warehouses for Associated British Ports at key locations across the UK.

The programme included the construction of modern bulk storage facilities at Ayr Harbour, Garston Port in Liverpool, and Ipswich Port. Delivered through our integrated Design & Build approach, the projects provided efficient, high-quality storage infrastructure tailored to the operational requirements of each port. The successful delivery of these developments demonstrates 3b construction's expertise in delivering large-scale industrial and logistics projects safely, efficiently, and to the highest standards.

"3b construction know what they are doing and do it well"

Bob Phillips - Engineering Manager, Associated British Ports
