

3b

LAND ENERGY

Role: Land Energy **Client: Private**

3b construction was appointed as Principal Contractor for the delivery of key infrastructure works at Land Energy's biomass production facility.

The project involved the design and construction of reinforced concrete tunnels, silo bases, and process plinths to accommodate new production plant, together with extensive civil engineering and infrastructure works. Delivered through 3b's integrated in-house expertise, the project demonstrates our capability to successfully deliver complex industrial and energy sector developments while maintaining the highest standards of quality, safety, and programme performance.
